Church Edit launches a new package for 'Church Planting'

Church Edit has today launched a new package for Christians/Churches/Denominations that are planting a new church. Starting a new church/ church plant can involve a lot of start-up costs but an effective and powerful website now doesn't have to be one of these expensive costs.

The Church Planting package offers all the benefits of the powerful Church Edit software but at an incredible price:

- **Church Edit** is available for just £99+vat.
- **Church Edit Pro** (with interactive features for members) is available for just £199+vat.

To help these new churches/plants we will extended the standard package length from the usual 12 months to **14 months** making it even greater value for money. Also included is space for **60 audio** files allowing church plants to upload their sermons every week for the first 14 months.

Other features include:

- multiple editors to update the website
- calendar
- photo albums
- podCasting
- search engine
- discussion forums (Church Edit Pro)
- member logins and member only pages (Church Edit Pro)

Churches that are being planted can contact Church Edit for more details or request a trial website to try Church Edit.
